Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I Claims 1-17 are drawn to a device classified in class 435, subclass 288.1.

Group II Claims 18-30 are drawn to a method for treating patients having a severe peripheral bacterial infection, classified in class 435, subclass 2.

2. Groups I and II are product and process of using. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a material different process of using that product (MPEP 806.05(h)). In the instant case, a method for treating patients having a severe peripheral bacterial infection can be accomplished by using antibiotics.

3. Because these inventions are distinct for the reasons given and have acquired a separate status in the art because of their recognized divergent subject matter as shown by their different classification, restriction for examination purposes as indicated is proper. Moreover, in the absence of restriction it would place an undue search and examination burden on the examiner.

4. Applicant is advised that the reply to this requirement to be complete must include an election of invention to be examined even though the requirement be

Art Unit: 1645

5. Applicant is reminded that upon that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
